### Engineering Plan 600

This is the detailed execution plan for integrating the engineering organization of the target. The owner should ensure that all subtask owners are fully briefed on the product line objectives and have visibility into related tasks. The owner also ensure that subtask target dates meet necessary integration timeline milestone dates.

FUNCTIONS()

Submit

ABS	ABS(number)	Returns the absolute value of the number
AND	AND(value1,value2,...)	Returns TRUE if all arguments have a value of TRUE and FALSE otherwise
APPENDLIST	APPENDLIST(value1,[value2],...)	Combines multiple lists into a single list
CEIL	CEIL(number)	Returns the nearest integer that is greater than or equal to the value
COLUMN	COLUMN(matrix,column_num)	Returns the specified column within a matrix
CONCATENATE	CONCATENATE(string1,string2,...)	Concatenates one or more strings into a single string
CONTAINS	CONTAINS(find_value,within_value,[start_index])	Returns the index of the list or row of the matrix containing the specified value. Returns 0 if the value is not found.
COUNT	COUNT(list)	Returns the number of non-empty, non-error values in the list
CURRENTDEAL	CURRENTDEAL()	Returns the current deal, if any
CURRENTUSER	CURRENTUSER()	Returns the current user
DATE	DATE(year,month,day)	Returns the date
DATEFROMNUM	DATEFROMNUM(number)	Returns a date from number in the Microsoft Excel date-time code
DATETONUM	DATETONUM(date)	Returns the number that represents the date in Microsoft Excel date-time code
